### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.

### DETAILED ACTION

1. This is a 371 of PCT/EP03/00276.

Claims 1-8 are pending.

2. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 is ambiguous as to what is the scope of the claim. If the claim is drawn to "compound", then it is essential duplicate of claim 1. If the claim is drawn to method of using compound of claims 1-4, the target, site of administration, dosage etc. for carrying out the method have not been included.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Daele et al. US 5,854,260 in view of EP 389,037, US 5,374,637, WO 96/10027, WO 97/31897, WO 97/24356, WO 97/30031, EP 299,566 (all recited on 1449).

Determination of the scope and content of the prior art (MPEP §2141.01)

Van Daele et al. '260 disclosed prucalopride and its salt for treating gastrointestinal motility disorder.

Art Unit: 1625

Ascertainment of the difference between the prior art and the claims (MPEP §2141.02)

The claims differ from the prior art in that the claims are drawn to N-oxide of the prior art compound prucalopride. Per ponderous of evidence in the record indicated that in similar compounds, N-oxides are expect to have similar activity as the parent compounds.

Finding of prima facie obviousness—rational and motivation (MPEP§2142-2143)

One having ordinary skill in the art is deemed to be motivated to prepared the particular N-oxide as prepared in analogous art, and expect it to have similar therapeutic activity as the parent compound in view of the per ponderous of teaching in expectation of N-oxides in analogous art. Applicants provided at page 9 of the specification pharmacokinetic data comparing the instantly claimed compound with the parent compound without any showing of unexpectancy. No description on what compound was tested (please note compound and each addition salt are separate species) and no evidence that the testing results is commensurate to the claimed scope including compound as well as any and all salt. Further, there is no conclusion as to what is unexpected when there is lower systemic exposure.

4. References recited on PTO-892 are for showing state of the art.
